

Hamilton Boom Lift License

Hamilton Boom Lift License - Only fully licensed individuals must operate an aerial boom lift. Qualification could be obtained through a combination of sessions in the classroom and practical training with the specific type of aerial lift which will be utilized on the job. A License is needed for anybody who works on or operates an aerial boom lift.

Various kinds of vehicle-mounted aerial devices include aerial ladders, extensible boom platforms, vertical towers, articulating boom platforms, and any combination of these kinds.

When making use of a boom lift, there are several basic safety rules that apply to all boom lifts. Safety of the worker is a top priority whilst they are working inside the basket. The worker must at all times wear a body harness and lanyard, attaching it to the boom or basket. Never tie off to an equipment, an adjacent pole or a structure. Personnel should stand on the floor of the basket, and never sit or climb on the basket edge. The manufacturer's load limitations should be followed.

Aerial lift operators must be authorized to make use of the machines. The operator has to be familiar with all the aspects of the device and must have access to the manufacturers guidebook which should be kept within the lift. Operators are responsible for making sure that safety procedures are followed in the operation of the lift. Testing lift controls on a daily basis should be performed. Set brakes and position outriggers (if they are utilized) on pads or a stable surface. When working on a slope, make use of wheel chocks.

The aerial lift vehicle should never be moved whilst a worker is inside the basket of an elevated boom, unless they are utilizing equipment that are particularly designed for this. Articulating boom and extensible boom platforms used as employees carriers must have plainly marked, accessible, upper controls. Except in emergency conditions, lower controls should not be used to override upper controls unless authorization has been given by the individual within the lift.

Do not wear pole or tree climbers shall while working from an aerial lift.

Do not alter the insulated portion of the aerial lift.

Do check the booms to make certain that it is correctly cradled and the outriggers are in the stowed position before moving.

Make sure that lifts being used in or near power lines are di-electrically tested and conform to local regulations.
