Hamilton Order Picker License

Hamilton Order Picker License - Order picking is otherwise called order preparation operation. This is among the main processes in a warehouse and consists of people called order pickers, taking and collecting articles in a certain quantity previous to shipment so as to complete customer orders. Order picking is a basic warehousing method. The efficiency in which this particular job is done can be directly connected to a supply chain's productivity. Hence, order picking is one of the most controlled logistic processes. Order picking falls within the category of the warehouse management system.

There are certain kinds of order picking which comprise: pick to box method, wave picking method, piece picking or picker to part method, sorting systems method and zone picking method.

The pick to box method involves the order picker filling the box with the stuff from her or his station. The box then moves to other picking locations until the customer order is done. In this particular technique, there is no movement of the order picker employees. In the wave picking method, the order pickers move round in order to gather the required items for some orders. The piece picking or picker to part method is similar where the order picker or pickers move in order to gather the items required but for one order only.

In the sorting systems method, there is no movement of the order picking workers. Instead, the things are delivered to her or him through an automated system like for example a conveyor system or an automatic storage. In the zone picking method, each order picker is assigned to one particular zone. They are responsible for only realizing order picking in this specific zone.
