Hamilton Forklift Training Courses

Hamilton Forklift Training Courses - Our forklift operator safety training has been tailored for illiteracy, thus cutting the training time by 50%. We provide forklift training certification, lift-truck operator driver safety training evaluation, and train the trainer programs offer regulation-compliant, thorough training in industrial-powered fork truck safety and use. Lift truck pedestrian safety is offered as well.

We have a really experienced group of expert trainers to be able to make sure that your workers are well-trained. The certification is delivered on site by one of our licensed instructors. Trainees will learn how to recognize dangers and perform safety checks necessary for the safe and efficient operation of a powered industrial lift truck.

Forklift Training Tips
It is important that all workplaces utilizing forklifts have the checklist below or one equivalent on the premises. If all of the safety rules are being followed, each of these questions should be answered with a "yes". A "no" to whichever question indicates a procedural flaw which can cause accident, injury or damage to machine.

1) Is the forklift operating area separated from pedestrian traffic?
2) Is access by pedestrians to forklift areas restricted by a barrier?
3) The walkways for pedestrians are well-marked?
4) Are "forklift in operation" signs clearly visible?
5) Are mirrors for pedestrians and drivers provided at blind spots?
6) Are alterations to daily forklift schedules communicated to all affected staff?
7) The lift truck tires being used are suitable for all operating surfaces?
8) Forklift seatbelt is being used?
9) The forklift seat is in good condition?
10) Is a regular forklift maintenance schedule followed?
11) Are annual checks of the forklift being carried out?
12) Is the forklift right for the needed job?
13) Does forklift has a readable load chart?
14) Can the operators understand and read the load chart?
15) Does the chart list the safe capacity for different uses and attachments?
16) Do the forklift warning devices work correctly?
17) The speed operating control device is secured properly?
18) The lift truck overhead cage is fitted right?
19) Have all forklift operators acquired certification?
20) Warning signs and speed limits are being observed?
21) Are lift truck operators up to date on training for all types of lift trucks being used?
22) Do operators know their responsibilities to report any equipment damage and forklift incidents?
23) Is the pre-test checklist reviewed on a daily basis prior to the equipment being used?
