Hamilton Manlift Ticket

Hamilton Manlift Ticket - The Elevated Platforms and Manlifts Certification course helps to provide the required training on the work practices, safe operating procedures, regulations and rules regarding the everyday activities for the operators of this machinery. The course has been designed for individuals who are actively involved in these activities or individuals who have a basic understanding of this machine.

manlifts and aerial platforms have become common and integral machines in industrial settings over the last few decades. These machines provide an easy way to lift staff near what has to be carried out on a stable platform apparatus, allowing employees to perform tasks with greater comfort and safety rather than being perched on top of ladders or scaffoldings.

Similar to every other tool, manlifts are only safe if they are used properly. As they lift staff above ground level or floor, accidents could occur easily and this can cause serious injuries or fatalities for both the manlift operators as well as whoever passerby who may not be lucky enough to be standing underneath.

There are different types of manlifts. The majority fall into 1 of 2 categories: the articulating boom lift, that has the capability of both vertical and horizontal movement and the scissors lift, that is capable of moving upward and downward.
